Professional Summary

Backend-focused Python Developer specialising in scalable web applications and RESTful APIs with Django. Experienced in containerised deployments (Docker, AWS) and applying DevOps practices for reliable production systems. Skilled in backend architecture, authentication, and performance optimisation, with additional expertise in web scraping and backend–frontend integration.

Experience

Backend Developer – Zapuza (Aug 2024 – April 2026, Remote)

- **Designed and deployed** RESTful APIs with Django and DRF for e-commerce and SaaS platforms.
- **Implemented secure** authentication and optimised backend performance, reducing API latency by 25%.
- **Containerised applications** with Docker and deployed to AWS (EC2, RDS, S3).
- **Applied backend security** best practices and performance tuning.
- **Collaborated** with frontend teams to ensure seamless API integration and responsive user experiences.

QA Engineer (Manual) – Utest (2021–2024, Remote)

- **Executed test cases** to validate functionality across web and mobile applications.
- **Identified and documented defects** with clear reproduction steps and severity levels.
- **Collaborated with developers** to troubleshoot issues and verify fixes.
- **Ensured product quality** by performing regression, exploratory, and usability testing.
- **Applied agile practices** to improve workflow efficiency, communication, and delivery timelines.

Assistant Restaurant Manager – Nejoun Al Emarat (2019 – 2021, Sharjah, UAE)

- **Managed** daily operations and supervised team performance across a busy restaurant.
- **Strengthened** leadership, operational discipline, and problem-solving skills.
- **Improved** workflow efficiency and team coordination, skills now applied to agile software development.

Education

- **Cybersecurity – MIVA Open University** (*Expected 2027*)
- **Business Administration – Chukwuemeka Odumegwu Ojukwu University** (COOU)

Technical Skills

Backend & APIs

- Python, Django, Django REST Framework, Django Ninja
- REST API Design, Asyncio, Threading, Celery

Databases

- PostgreSQL, SQLite

DevOps & Deployment

- Docker, AWS (EC2, RDS, S3, Route53, ACM), CI/CD Fundamentals
- Linux
- Kubernetes

Frontend

- HTML5, CSS3, Bootstrap, HTMX
- React (basic)
- Bootstrap
- API integration and responsive interface structuring

Other

- Git, GitHub, Python Web Scraping, C Language
- Generative AI / ML (learning)
